

Luminfusion

dermalogica PRO

WHAT IS LUMINFUSION?

Luminfusion is a supercharged skin service which takes luminosity to a whole new level of skin care and draws on the use of Nanoinfusion with dermalogica products, professional-grade exfoliants and masques. This 60-minute service takes a unique approach with advanced exfoliation using different types of exfoliations at once using Nanoinfusion technology and LED light therapy.

WHAT DO YOU SEE AFTER THE TREATMENT?

Improved skin luminosity, smooth fine lines and wrinkles, which instantly reveals radiant skin.

LUMINFUSION

is a non-invasive technique using a professional PRO pen with stainless steel cone nanotips, which resurfaces the skin and enhances product penetration. The disposable cartridges have microscopic hair like cones formed of silicone or stainless steel that DO NOT penetrate skin. Nanoinfusion helps improve skin texture, boost hydration as well as addressing signs of premature skin aging. By separating the cells within the very top layer of the skin (the epidermis) accelerating desquamation (the removal of dead skin cells) facilitating product penetration. Increases circulation and cell renewal smooths fine lines. No downtime. What you will notice is the immediate visible change in the skin, a hydrated glow.

PRO NANOINFUSION FOR EYE AND LIP, ADD-ON.

This add-on is a targeted treatment for common areas of concern – the eye and lip area. We use silicon cartage tips as this is a softer metal designed to be used around lips and eyes. It is recommended that the eye and lip add-on is performed prior to performing Nanoinfusion over the rest of the face.

PRE-PROCEDURE RECOMMENDATIONS

- 1.** So do not use topical agents that may increase the sensitivity of your skin such as retinoids, exfoliants, topical antibiotics or hydroxy acids 5-7 days prior to your treatment.
- 2.** Avoid IPL/Laser procedures for at least 2 weeks prior to treatment.
- 3.** No waxing depilatory creams or electrolysis to the area being treated for 5 days prior.
- 4.** Avoid unprotected sun exposure or sunburn at least one week before treatment.
- 5.** Do not shave your face the day of your treatment to avoid skin irritation.
- 6.** Keep make-up to a minimum on the day of the treatment and do not experiment with new products beforehand.
- 7.** Avoid alcohol and caffeine 24-48 hours before treatment.

POST CARE RECOMMENDATIONS

- 1.** Try to stay out of excessive sun exposure such as tanning and sunbathing for at least 10 days to avoid risk of hyperpigmentation and sensitive skin.
- 2.** Do not apply make up immediately after treatment. Continue to wear SPF 30+ daily.
- 3.** Gently cleanse your face before bedtime on the day of the treatment with ultra calming cleanser and tepid water.
- 4.** Use serums and the recommended skin care products per your skin therapist directions.
- 5.** Avoid sweaty exercise, saunas, and swimming for at least 48 hours after the procedure.
- 6.** Avoid immediately using active skin care (including AHA/BHAs, exfoliants, vitamin A, Retinol etc.) for at least 3-5 days.
- 7.** Treatment plans and home care will be discussed after your treatment.

WHAT IS THIS LED (LIGHT-EMITTING DIODE) THERAPY I REFERRED TO EARLIER?

The science behind light therapy is a non-invasive treatment that uses low level, safe light to improve the skin's appearance. The different wavelengths of light enters the skin at a distinctive depth to target a variety of skin conditions. LED therapy is primarily known for helping stimulate collagen production, which can help to smooth the skin's appearance and reduce visible damage from acne, age spots and wrinkles. Unlike other types of light therapy, LED are safe for regular use on all skins tones and types because they do not contain ultraviolet (UV) rays. There are certain contraindications but that will be discussed before treatment. Red light therapy is a treatment used to address early signs of premature skin aging and promote wound healing and repair. Blue LED light therapy is a treatment that uses blue light wavelengths to penetrate the skin and kill acne-causing bacteria by using exposure to blue light. Often used to treat acne.

We use LED light therapy with a special 'light energy masque' to support skin's energy and smooth texture lines and wrinkles, toward the end of the treatment.

APPOINTMENT

To book an appointment, book online or text Elaine to discuss your concerns.

This is a very relaxing treatment with optional shoulder massage during your treatment.
